

SRA-900i

Classroom Soundfield System - IR

Okayo new classroom amplification has two infrared microphone channels and has great benefits for teachers as it allows the teacher to use the same microphone in multiple classrooms without changing channels and creates an efficient teaching environment for students. It provides dual sensor ports to create a full coverage depending on environment. No more worries about radio interference experience.

Features:

-  Worldwide license free band.
-  Individual microphone volume control.
-  Inputs and controls for PC/MUSIC, AUX.
-  Independent control for Bass and Treble.
-  3-band EQ for ALD output.
-  LINE/MIC switchable.

Specifications	SRA-900i
Output power	20W @ 8 Ω
Carrier frequency	2.3 ~ 2.8 MHz
Frequency response	20Hz ~ 20 kHz
Receiver module	IR-502 x 1
Audio input	PC, MUSIC, AUX
Audio output	AUX, ALDS
Sensor connectors	RCA x 2
Power requirements	100 ~ 240 V AC / 18 V DC, 3.25 A switching power adaptor
Dimensions (D x W x H)	205 x 215 x 51 (mm)
Weight	Approx. 1.4 kg (3.1 lbs)
